

ASX ANNOUNCEMENT | 22 February 2019

APPOINTMENT OF CHIEF OPERATING OFFICER

Altura Mining Limited (ASX Code: AJM) is pleased to advise that it has appointed experienced mining executive Mr Phil Robinson to the position of Chief Operating Officer (COO).

Mr Robinson brings a strong operational focus to the role and his skill base is in line with the Company's transition from project developer to miner. His primary focus will be finalising the ramp-up to nameplate production at Altura's 100%-owned Pilgangoora Lithium Project located in the Pilbara region of Western Australia, followed by ensuring the operation is delivering optimum production and cost performance.

Mr Robinson brings to the role more than 20 years' experience in mining and processing, in particular with greenfields mining developments. He was most recently Altura's General Manager – Operations, a role he has held since July 2018, and prior to that he was the Registered Manager, playing an instrumental role in the Pilgangoora development.

Altura Managing Director Mr James Brown said Mr Robinson has demonstrated strong leadership and a commitment to safety during development and into the production phase. "Phil is a highly-experienced mining and process operations manager. He is the ideal person to guide us through to nameplate production and to deliver the cost structure we expect the operation to achieve," he said.

Further market updates will be provided as the project moves towards full commercial production.

About Altura Mining Limited (ASX: AJM)

Altura is a key player in the global lithium market and is leveraging increasing demand for raw materials for manufacturing lithium ion batteries for electric vehicles and static storage uses. Altura owns and operates the world-class Altura Lithium Project at Pilgangoora in WA's Pilbara, which has a production capacity of 220,000tpa of quality spodumene concentrate. The Company has completed a Definitive Feasibility Study on a potential Stage 2 expansion, with a Final Investment Decision due following a review of the Stage 1 operations and ramp-up to nameplate production.
